

I have Satellite radio for a reason and that is I cannot get decent programming from my local radio stations. This is also the reason that people have satellite dishes and cable TV, and I don't see you wanting to shut them down in certain markets. If you would stay out of the free market and let it work as it was ment to the consumer will dictate the type of service they would prefer. Vote for freedom of choice and tell the NAB to go home and change the way they do business to get listeners back. Thank you
Shane Murphy
